

Hang Seng Investment Index Funds Series IV

Hang Seng China New Economy Index ETF

December 2022

IMPORTANT RISK WARNINGS/FUND INFORMATION FOR INVESTORS

- The investment objective of Hang Seng China New Economy Index ETF ("HSCNE ETF") is to match, as closely as practicable, before fees and expenses, the HKD denominated total return performance (net of withholding tax) of the Hang Seng China New Economy Index (the "Index") through investing primarily in the constituent securities of the index.
 - As "HSCNE ETF" invests primarily in securities of companies classified under the industries that are perceived as "New Economy" under the Hang Seng Industry Classification System, an investment in "HSCNE ETF" may be more vulnerable to price fluctuations of securities of companies in these industries and other factors that particularly affect these industries as compared to an investment in a fund having a more diverse portfolio of investments. In addition, the valuation of securities associated with "New Economy" industries may be higher than those of more traditional industries, and "HSCNE ETF" may suffer a loss when there is a revaluation of these securities or subject to significant instability and fluctuations in valuations.
 - As "HSCNE ETF"'s investments are concentrated in a specific geographical location (i.e. the PRC), the value of "HSCNE ETF" may be more volatile than that of a fund having a more diverse portfolio of investments. The value of the Fund may be more susceptible to adverse economic, political, policy, foreign exchange, liquidity, tax, legal or regulatory event affecting the PRC market.
 - "HSCNE ETF" is also subject to investment risk, currency and exchange rate control risk, equity market risk, PRC market and concentration risks, risks relating to investments in "New Economy" companies, risks associated with investments in companies with weighted voting rights, Stock Connect risk, U.S. market risk/ADRs associated risk, PRC tax risk, RMB currency and conversion risk relating to RMB denominated securities, trading risk, trading differences risk, passive investment risk, reliance on market maker risk, tracking error risk, termination risk and reliance on the same group risk.
 - The Manager may at its discretion pay dividend out of capital or effectively out of the capital[^] of the Fund. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any such capital gains attributable to that original investment. Any such distributions may result in an immediate reduction in the Net Asset Value per Unit.
 - Investments involve risks and investors may lose substantial part of their investment in "HSCNE ETF".
- [^] The Manager may at its discretion pay distribution out of gross income while charging/paying all or part of the Fund's fees and expenses to/out of the capital of the Fund (resulting in an increase in distributable income for the payment of distribution by the Fund), and thereby effectively pay distributions out of the capital of the Fund.
- Investors should not only base on this material alone to make investment decisions, but should read the HSCNE ETF's offering documents (including the full text of the risk factors stated therein) in detail.

Investment Objective

The investment objective of the Fund is to match as closely as practicable, before fees and expenses, the HKD denominated total return performance (net of withholding tax) of the Hang Seng China New Economy Index (the "Index") through investing primarily in the constituent securities of the Index.
